

Objectif

- Réorganiser les équipes prêt-à-porter
- Établir de nouveaux organigrammes
- Calibrer et transformer les espaces pour faciliter la collaboration
- Limiter les travaux pour des raisons budgétaires et de perturbations des équipes pendant le développement des collections

Délai de conception

3 semaines sur site

Prototypage et répétitions

Le R-1 est utilisé uniquement en fin de collection avant les défilés et sessions de ventes.

Cet espace reçoit les postes additionnels nécessaires à la fabrication des prototypes ou répétitions des produits vendus - il ne s'agit pas d'une production normalisée mais d'une mini chaîne de prototypage.

Un stock tampon de matières et fournitures est aussi aménagé
